

**Grants Pass Golf Club
Green Committee Minutes
May 9, 2011**

Gary Fahl called the meeting to order at 3pm. In attendance were Terry Soeteber, Mickey Rhodes, Dee Hushbeck, John Delaney, Gary Schaefer, Dean Garrison, Denny Curle and Matt Reams.

Don Myrick sent the Green Committee a letter wanting us to review projects that the green Committee under takes and making sure that we do not violate the Club's policy in needing architectural input. After some discussion, the general consensus was that we have not violated the policy in question and that Denny Curle will discuss the issue with Don.

John Delaney reported that GPID will have water available to the golf coarse by the middle of next week. The punching of the greens, approaches and tees went very well with the new equipment. After just a weeks time they are 75% healed,(that is this writers opinion}. The crew lunch has been scheduled for May 23rd at 12 noon. The next member work party will be June 13th. Work will start at 9am, followed by a lunch at noon. We are planning a work day in July also but have not firmed up the date.

A discussion about the club's long range planning process was held. Matt Reams explained that the Finance Committee has been assigned the task of separating out each of the committee's long range planning projects and developing a single list of projects to submit to the board for approval. Matt hopes to devote 4% of each years budget the long range planning projects. Considerable work needs to be done before we have a finished product.
